Eleven Plus Maths How To Do – Time – The Four Rules – Division

60 seconds = 1 minute
60 minutes = 1 hour

(1) Example: 17 hours 45 mins - 5

　　　　　Set out the sum, well spaced out

```
    3  hrs           33  mins
5   17 hrs           45 mins
    15               120
    2 hrs            165        Divide 165 by 5 = 33
```

Divide 17 hrs by 5. Change 2 hrs in to mins. Carry the 120 mins to the minute column and add.

(2) Example: 17 hrs 48 mins ÷ 5

　　　　　Follow the same steps until you get a remainder of 3 mins.

```
    3  hrs           33  mins              36 secs
5   17 hrs           48 mins              0 secs
    15               120                  180

    2 hrs            168                  180
                     165                  180

                     3 mins..             ......
```

Change the 3 minutes into seconds and carry the answer over to the seconds column. Add 180 + 0 = 180

Divide 180 by 5   180 ÷ 5 = 36
