

Eleven Plus Maths Worksheet - Percentages to Fractions

QUESTION	
	<p>What is 64% as a fraction in its lowest terms?</p> <p>(a) $\frac{64}{100}$ (b) $\frac{32}{100}$ (c) $\frac{32}{50}$ (d) $\frac{16}{25}$</p>
HINT	
	<p>What is 64% as a fraction in its lowest terms.</p> <p>% means part of a hundred.</p> <p>So 64% means 64 parts of a hundred or $\frac{64}{100}$</p> <p>Now cancel to bring the fraction to its lowest terms. What is the biggest factor which will cancel in to both 64 and 100?</p> <p>2? 3? 4?</p> $\frac{64}{100} = \div 4 \quad \frac{16}{25}$
ANSWER	
	<p>d</p>
