

Eleven Plus Maths Worksheet - Percentages to Fractions

QUESTION	
	<p>What is 64% as a fraction in its lowest terms?</p> <p>(a) <math>\frac{64}{100}</math>    (b) <math>\frac{32}{100}</math>    (c) <math>\frac{32}{50}</math>    (d) <math>\frac{16}{25}</math></p>
HINT	
	<p>What is 64% as a fraction in its lowest terms.</p> <p>% means part of a hundred.</p> <p>So 64% means 64 parts of a hundred  or <math>\frac{64}{100}</math></p> <p>Now cancel to bring the fraction to its lowest terms. What is the biggest factor which will cancel in to both 64 and 100?</p> <p>2? 3? 4?</p> $\frac{64}{100} = \div 4 \quad \frac{16}{25}$
ANSWER	
	<p>d</p>
